What Comes Next

Compute

- OpenCL

Compute

- OpenCL
 - Qualcomm & freedreno support in progress
 - NVidia & nouveau support in progress
 - Vivante & etnaviv support in progress

Compute

- OpenCL
 - Qualcomm & freedreno support in progress
 - NVidia & nouveau support in progress
 - Vivante & etnaviv support in progress
- Vulkan Compute
 - Supported by Intel and AMD

Compute

- OpenCL
 - Qualcomm & freedreno support in progress
 - NVidia & nouveau support in progress
 - Vivante & etnaviv support in progress
- Vulkan Compute
 - Supported by Intel and AMD
- SYCL
 - High level & built on top of OpenCL

Big Picture

Big Picture

- Some drivers are very mature

Big Picture

- Some drivers are very mature
- Community drivers share common codebase

Big Picture

- Some drivers are very mature
- Community drivers share common codebase
- Reverse engineering takes 0-7 years

Big Picture

- Some drivers are very mature
- Community drivers share common codebase
- Reverse engineering takes 0-7 years
- Compute still on the way

Why Open Source?

Why Open Source?

- Long-term support

Why Open Source?

- Long-term support
 - Up to 20 year old drivers currently supported

Why Open Source?

- Long-term support
 - Up to 20 year old drivers currently supported
- High performance & conformance

Why Open Source?

- Long-term support
 - Up to 20 year old drivers currently supported
- High performance & conformance
- Much simpler debugging

Why Open Source?

- Long-term support
 - Up to 20 year old drivers currently supported
- High performance & conformance
- Much simpler debugging
- Old hardware receives new features

Thank you!
